2	Changes Made	8
2	Directory Structure After Cleanup	59
2	Statistics	87
2	Known Issues	95
2	Next Steps	102

Resumen del Contenido

Cleanup Summary

This document summarizes the cleanup performed on the production_code directory.

Date

2025-01-27

Changes Made

1. Documentation Organization

- Created `docs/` directory for organized documentation
- Created `docs/archive/` for old/redundant documentation
- Moved 27 redundant markdown files to archive:
 - 14 REFACTORING_*.md files (kept only REFACTORING_ABSOLUTE_FINAL.md)
 - 5 MEJORAS_V*.md files (kept only MEJORAS_V6.md)
 - 2 RESUMEN_*.md files (kept RESUMEN_FINAL_COMPLETO.md and RESUMEN_COMPLETO_MEJORAS.md)
- Moved remaining markdown files from root to docs/:
- API_README.md
- RESUMEN_ULTIMO.md
- MEJORAS_MODULOS_V2.md
- Organized active documentation in `docs/`:
 - Feature documentation (CHAT_README.md, MONITORING_README.md, etc.)
 - Improvement docs (MEJORAS_V6.md, etc.)
 - Summary docs (RESUMEN_FINAL_COMPLETO.md, etc.)
 - Reference docs (CATEGORIAS_COMPLETAS.md, etc.)

2. Example Files Organization

- Created `examples/` directory

- Moved 11 example files to `examples/`:
- example_advanced_usage.py
- example_analysis.py
- example_chat.py
- example_checkpointing_quality.py
- example_config.py
- example_integrated.py
- example_migration.py
- example_monitoring.py
- example_usage_improved.py
- example_usage.py
- example_video_generation.py

3. File Cleanup

- Removed Python cache files (``\_\_pycache\_\_`` directories, *.pyc files)
- Removed backup files (*.py~)

4. Documentation Updates

- Updated README.md to reflect new structure
- Created docs/README.md as documentation index
- Updated references to moved documentation files

5. Files Kept (Not Duplicates)

- `cli.py` and `cli\_unified.py` - Both serve different purposes:
- `cli.py`: Simple CLI with Click for basic operations
- `cli\_unified.py`: Comprehensive unified CLI for all modules
- `api\_server.py` and `api\_unified.py` - Both needed:
- `api\_server.py`: Simple wrapper to start the API server
- `api\_unified.py`: Full API implementation

Directory Structure After Cleanup

production_code/

- docs/ # Organized documentation
- ■■■ README.md # Documentation index
- ■■■ archive/ # Old/redundant docs
- ■■■ [active docs] # Current documentation
- examples/ # Example scripts
- ■■■ example_*.py
- core/ # Core modules
- research/ # Research modules
- inference/ # Inference modules
- memory/ # Memory modules
- techniques/ # Technique modules
- best/ # Best models
- code/ # Code-related modules
- redundancy/ # Redundancy modules
- architecture/ # Architecture modules
- multimodal_api/ # Multimodal API
- sora/ # Sora module
- model_data/ # Model data management
- static/ # Static files
- tests/ # Tests
- [main scripts] # Main entry points
- README.md # Main documentation

Statistics

- **Files Archived**: 27 markdown files
- **Files Organized**: 11 example files + 3 additional markdown files moved to docs/
- **Directories Created**: 2 (docs/, examples/)
- **Cache Files Removed**: All __pycache__ and *.pyc files
- **Root Directory**: Reduced from 73+ markdown files to 2 (README.md and CLEANUP_SUMMARY.md)

Known Issues

Pre-existing Issue

There is a naming conflict between the ``code/`` directory and Python's built-in ``code`` module. This causes import issues when torch tries to import the built-in ``code`` module. This is a pre-existing issue and not caused by the cleanup.

****Recommendation****: Consider renaming the ``code/`` directory to something like ``code_modules/`` or ``code_models/`` to avoid this conflict.
