Resumen del Contenido

Phase 1 Complete: API Utils Consolidation ■

****Date**:** 2025-01-27

****Status**:** ■ Completed

Summary

Successfully consolidated the three `api\_utils.py` files into a single, comprehensive module at `api/api\_utils.py`.

Changes Made

1. Merged Functionality into `api/api\_utils.py`

****Enhanced `api/api\_utils.py` with:****

- ■ `validate\_tensor\_shape()` - Comprehensive tensor validation with NaN/Inf checks
- ■ `tensor\_to\_list()` - Tensor conversion utility
- ■ `validate\_episode\_data()` - Enhanced to use `validate\_tensor\_shape()`
- ■ `validate\_query\_data()` - Enhanced to use `validate\_tensor\_shape()`
- ■ `validate\_items\_data()` - Enhanced to use `validate\_tensor\_shape()`
- ■ `validate\_float\_range()` - Range validation helper
- ■ `validate\_int\_range()` - Range validation helper
- ■ `validate\_k\_value()` - Now with default parameter support
- ■ `validate\_priority()` - Now with default parameter support
- ■ `validate\_similarity\_threshold()` - Now with default parameter support
- ■ `format\_response()` - Enhanced with metadata and request_id support

- ■ `paginate\_results()` - Pagination utility

****Total**:** 12 functions + 3 constants

2. Updated Imports

****Files Updated:****

- ■ `api\_unified.py` - Changed from `from api\_utils import` to `from api.api\_utils import`
- ■ `tests/test\_api\_utils.py` - Changed from `from api\_utils import` to `from api.api\_utils import`

3. Backward Compatibility

****Root `api\_utils.py` now:****

- ■ Emits deprecation warning when imported
- ■ Re-exports all functions from `api.api\_utils` for backward compatibility
- ■ Clear documentation about deprecation
- ■ Will be removed in a future version

File Status

File	Status	Action
----- ----- -----		
`api/api_utils.py`	■ Enhanced	Primary location, all functionality
`core/api_utils.py`	■ Unchanged	Different purpose (web framework utilities)
`api_utils.py` (root)	■■ Deprecated	Re-exports from `api.api_utils`, emits warning

|-----|-----|-----|

| `api/api\_utils.py` | ■ Enhanced | Primary location, all functionality

| `core/api\_utils.py` | ■ Unchanged | Different purpose (web framework utilities) |

| `api\_utils.py` (root) | ■■ Deprecated | Re-exports from `api.api\_utils`, emits warning |

Verification

Import Test

New way (recommended)

```
from api.api_utils import validate_episode_data,
validate_query_data
```

Old way (still works, but deprecated)

```
from api_utils import validate_episode_data, validate_query_data
```

■■ DeprecationWarning: api_utils (root) is deprecated...

Functions Available

All functions from root ``api_utils.py`` are now available in ``api/api_utils.py``:

- ■ ``validate_tensor_shape()``
- ■ ``tensor_to_list()``
- ■ ``validate_episode_data()``
- ■ ``validate_query_data()``
- ■ ``validate_items_data()``
- ■ ``validate_k_value()``
- ■ ``validate_priority()``
- ■ ``validate_similarity_threshold()``
- ■ ``validate_float_range()``
- ■ ``validate_int_range()``
- ■ ``format_response()``
- ■ ``paginate_results()``
-

Benefits

1. ****Single Source of Truth****: All API validation utilities in one place
2. ****Better Organization****: Follows layered architecture (presentation layer)
3. ****Enhanced Functionality****: More comprehensive validation with NaN/Inf checks
4. ****Backward Compatible****: Existing code continues to work with deprecation warning
5. ****Clear Migration Path****: Deprecation warning guides users to new import path

Next Steps
